

Commercial Price List

1 Product Description

NextGen's Weather Analyst[®] application is comprised of the following four interconnected modules:

- Weather Data Manager (WDM)
- Weather Analysis as a Service (WA3S)
- Geo Weather Services (GWS)
- Weather Operations Dashboard (WOD)

Weather Analyst[®] enables users to perform discovery, query, and local storage of forecast products, generate timely, mission critical weather forecast products, automatically derived weather impacts, and issue and receive user-tailored weather advisories and warnings.

Weather Analyst[®] software is a web-based product which can be deployed as microservices onto various customer environments including a public cloud (hosted in customer CSP account, such as AWS) or on-premises (installed in customer data center). NextGen will work with the customer to determine the best deployment option and provide support for installation and configuration. Note: customer will require DoD certificates to access weather data source

2 Pricing & Terms

Weather Analyst[®] can be purchased by Subscription or Perpetual License with quantity discounts as shown below. Subscriptions and Perpetual Licenses include an Annual Support Agreement which includes installation/help-desk support and any upgrades from date of delivery. Software licenses start on the day of delivery and expire one year later unless otherwise specified in price quote. Maintenance is included at no charge with Subscriptions while Perpetual Licenses requiring a \$2,300 annual maintenance fee. NextGen's Weather Analyst[®] Software License Agreement Terms may be viewed at: www.nextgenfed.com/products/weather-analyst/sla/
